

unrelated individuals only

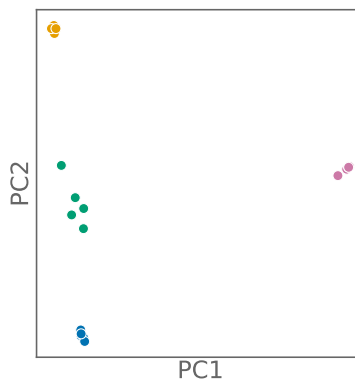

reference truth

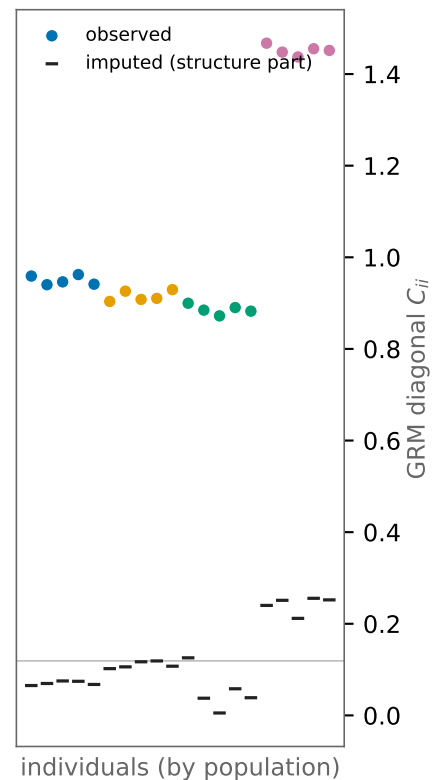

standard PCA
min $R^2 = 0.057$

standard PCA
+ --impute-diag
min $R^2 = 0.999$

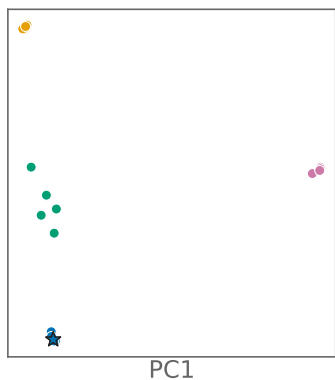

why: the observed diagonal
reflects heterozygosity

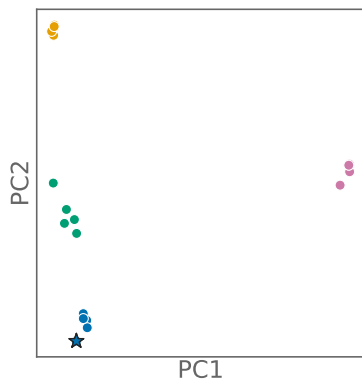

with relatives (two MZ pairs)

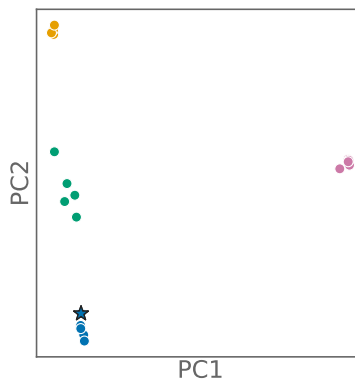

reference truth

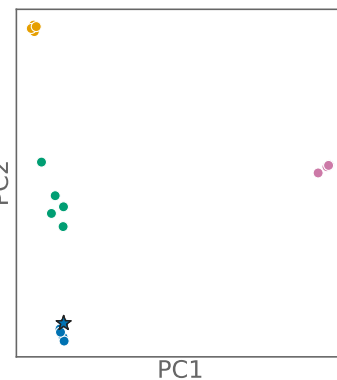

standard PCA
min $R^2 = 0.228$

aarobust-kin
(diagonal kept)
min $R^2 = 0.038$

aarobust-kin
+ --impute-diag
min $R^2 = 0.999$
